

IN THE CLAIMS

No claims are currently amended.

Please amend Claim 51 without prejudice or disclaimer of the subject matter thereof.

1. (Previously Amended) A device, being adapted for mobile use, for wireless, coded access of incident data including video from a remote vehicle continuous, incident recording system, located on a vehicle, the device comprising:
 - a) at least one interface for transmitting a code to the remote vehicle continuous, incident recording system to access the data;
 - b) an information data link, coupled to the at least one interface for receiving the accessed data; and
 - c) a transceiver coupled, at least indirectly, to the information data link, the transceiver adapted to transmit the accessed data from the remote vehicle continuous incident recording system located on the vehicle to the device or to a secure location separate from the device.
2. (Previously Amended) The device of claim 1 further including an information storage device.
3. (Original) The system of claim 2 wherein said information storage device is selected from the group consisting of a video tape drive, a hard disk drive, a CD ROM drive, and a solid state repository.
4. (Original) The device of claim 3 wherein said information storage device is adapted to prevent said information from being overwritten for extended periods of time.
5. (Original) The device of claim 1 wherein said information comprises identification information.

6. (Original) The device of claim 1 wherein said information comprises video information.
7. (Original) The device of claim 1 wherein said playing means comprises a visual display.
8. (Original) The device of claim 7 wherein said visual display is adapted for viewing video information.
9. (Original) The device of claim 8 wherein said visual display comprises a visual output interface to a display screen.
10. (Original) The device of claim 8 wherein said visual display comprises an off-board visual output interface.
11. (Original) The device of claim 1 wherein said information comprises audio information.
12. (Original) The device of claim 1 wherein said playing means is adapted for playing audio information.
13. (Original) The device of claim 1 wherein said information comprises time information.
14. (Original) The device of claim 1 wherein said information comprises vehicle dynamic information.
15. (Original) The device of claim 1 wherein said information comprises vehicle control information.

16. (Original) The device of claim 1 wherein said interface is a transceiver.
17. (Original) The device of claim 16 wherein said transceiver comprises download triggering means for initiating downloading of information from said Recording System.
18. (Original) The device of claim 17 wherein said download triggering means is adapted to respond to the occurrence of a predetermined event.
19. (Original) The device of claim 17 wherein said download triggering means is adapted to respond to transmitted instructions.
20. (Original) The device of claim 17 wherein said download triggering means is adapted to require input of an electronic access code.
21. (Previously Cancelled)
22. (Original) The device of claim 21 wherein said device is further adapted to decrypt said information.
23. (Original) The device of claim 2 wherein said information storage device is remotely located.
24. (Previously Cancelled)
25. (Previously Cancelled)
26. (Previously Amended) The device of claim 1 wherein said transceiver provides a transmission link.

27. (Original) The device of claim 24 wherein said transceiver comprises transmission triggering means for initiating transmission of information to an information storage device.

28. (Previously Amended) The device of claim 1 wherein said transceiver provides a transmission trigger for initiating transmission of information to an information storage device.

29. (Original) The device of claim 27 wherein said transmission triggering means is adapted to respond to transmitted instructions.

30. (Original) The device of claim 1 wherein said device is adapted for use in a vehicle.

31. (Original) The device of claim 30 wherein said vehicle is selected from the group consisting of a police cruiser, an ambulance, a fire truck, and a rescue vehicle.

32. (Original) The device of claim 1 wherein said device is adapted for use in a stationary facility.

33. (Previously Cancelled).

34. (Previously Amended) The device of claim 1 wherein the secure location is one or more of a hospital, a police station, and a fire station.

35. (Original) A method for remotely accessing and downloading stored information from a Recording System located on a vehicle, the method comprising:

(a) activating a download device comprising an interface for accessing and downloading said stored information from said Recording System, information input means in

communication with said download device, and playing means for displaying said information;

- (b) downloading said information on said Recording System; and
- (c) displaying said information.

36. (Previously Amended) A method for coded access by a remote device, adapted for mobile use, of incident data including video from a vehicle continuous incident recording system, located on a vehicle, comprising:

transmitting a code from the device, having an interface for coded access to the data, to access the data; and transmitting the accessed data from the vehicle incident recording system to the remote device or to a secure location separate from the device using a transceiver coupled to the device.

37. (Original) The method of claim 35 wherein said information comprises video information.

38 (Original) The method of claim 35 wherein said information comprises audio information.

39. (Original) The method of claim 35 wherein said information comprises time information.

40. (Original) The method of claim 35 wherein said information comprises vehicle dynamic information.

41. (Original) The method of claim 35 wherein said information comprises vehicle control information.

42. (Original) The method of claim 35 further comprising transmitting said information to an off-site location.

43. (Previously Cancelled)

44. (Previously Amended) The method of claim 1, said transmitting performed via a transmission link.

45. (Original) The method of claim 35 further comprising capturing and storing said information.

46. (Original) The method of claim 45 wherein said storing is accomplished remotely.

47. (Original) The method of claim 45 wherein said capturing storage device is selected from the group consisting of video tape, a hard disk, a CD ROM, and a solid state repository.

48. (Previously Amended) The method of claim 46, including capturing and storing said information on one or more of a video tape, a hard disk, a CD ROM, and a solid state repository.

49. (Original) The method of claim 35 further comprising inputting an electronic access code.

50. (Cancelled)

51. (Presently Amended) The method of ~~claim 50~~ claim 35 further comprising decrypting said information.

52. (Original) The method of claim 51, including decrypting said information
